### IMPROVING HEALTH

According to the U.S. Census Bureau, approximately 47 million Americans are currently without medical coverage.

Those same people can't go to the doctor nor can they get the prescription drugs that they need. What's worse is many Americans wait until they're so sick they have to go to the emergency room and come away with an obscenely large debt to the hospital.

### THE GOOD WILL NETWORK

was established to provide quality and preventive health care that the uninsured can afford.

Our Program allows people access to a network of specialists who have agreed to provide cash discounts for uninsured patients. See [www.helpforuninsured.com](http://www.helpforuninsured.com) for details.

### THE FREE CLINICS

Free Clinics provide medical services to uninsured, limited or low-income residents (usually a household income level of 200% or less of the poverty level).

The clinics are staffed by area physicians, nurses, and other volunteers who give freely of their time to bring quality medical services to our community. Before coming to any clinic, an eligibility interview appointment is necessary to determine if a patient qualifies for services.

### DISCOUNT MEDICAL PLANS

The range of discounts for medical services offered under the discount medical plan will vary depending on the type of providers and medical services. The discount medical plan does not offer a discount on hospital services. With discount health care programs you can receive services that you might not be able to otherwise.

### CATASTROPHIC OR MAJOR MEDICAL PLANS

are characterized by high health insurance deductibles and low monthly premiums. Under catastrophic health insurance plans, you tend to pay out-of-pocket for doctor's visits and prescription drugs, but major hospital and medical expenses above a certain deductible are covered. Most catastrophic health insurance plans cover hospital stays, surgery, and intensive care. [www.aflac.com](http://www.aflac.com)
